SARMAMENT IN LEAGUE MEETING.

MOMMENTS ON GERMANY'S ABILITY TO ARM FOR WAR.

CREATES STIR AT GENEVA.

An impassioned speech by M. Briand, the French Foreign " Minister, in the League of Nations Assembly, has created consternation in German political circles, and has thrown a depression over the German delegation at Geneva.

M. Briand was speaking on the problem of disarmament and his disturbing comments were in relation to Herr Mueller's recent speech declaring that as Germany had disarmed every nation in the world should follow suit.

The reply of the French Minister was to draw attention to Germany's potentialities of war. He pointed to her standing army of 100,000 composed of officers and non-commissioned officers and said that behind them is an immense reservoir of men who fought during the war.

He also dwelt on Germany's vast industrial resources, which he said would make it easy to furnish materials for war It is suggested that M. Briand was carried away by his lamateur golfer, is attempting to own eloquence and said things he did not intend.

The German Press is strongly critical of the speech declaring that it deals a heavy blow at the policy of Franco-German understanding, and discloses a deplorable distrust of Germany's sincerity and will for peace.

M. Briand has expressed surprise at the stir created by his speech. He says he did not intended to suggest that Germany has bellicose intentions. It is however impossible to avoid the fact that many countries have great potentialities for war, and he urged that the disarmament problem would never be solved without frank speech.

Professor Donnan belleves that no-one has come so near on the physiological side to solving the problem of the essential difference between life and death as Professor Hill.

> > Important Conclusions.

Professor Hill has for some time been devoting himself particularly to the study of the muscles" and nerve cells, and it is understood that his researches have led him to important conclusions.

These conclusions are based on the fact that when the human mechanism runs down, with consequent death, the cause is due to failure of the oxygen supply. which leads to an interruption of oxidisation and has its effect on the molecular structure.

But this interruption is something very different from that which takes place when an internal combustion engine runs. out of petrol.

What Causes Death.

While such an engine is not destroyed by the stoppage, any stoppage of the human mechanism is fatal. The reason, apparently. is that in human life another condition has to be reckoned with. namely, disintegration, which prevents the all-important process of

The Slumber Helmet.

A POPULAR FEATURE.

So popular is the so-called "hel-met" model for all kinds of headwear that designers of lingerie have now evolved what is known as a "slumber helmet," though such a cap is equally convenient for bou-doir use when it is desired to keep the hair in place. The fragile ma-terials used are so closely held by the frame-work and ties of ribbon that waved hair thus protected presents as attractive an outline in the morning as when the slumber helmet was donned at bedtime.

The distinguishing feature of this model cap is a set of ear tabs that extend sufficiently low to keep almost any cut of hair as it should be. There is also a deep curve where the hair usually dins over the forehead, so that this curve, too, is kept wel in place. Georgette is

MAKE THE WILL TO SAVE THE DEED BY EFFECTING LIFE INSURANCE

How many men, having decided to save say \$100 a year for 20 years, die after having accumulated only £200 or £300?

By investing the \$100 a year in Life Insurance the will would have been taken as the deed and at death the savings would have been anticipated.

RACING. GREYHOUND

Newspapers to hand from Shanghal show that the controversy on greyhound-racing, and the alleged evil influences arising therefrom. still continues. Some umbrage appears to have been taken at the nction of the Chinese Commissioner for Foreign Affairs in having written to the Consular Body refurther delay, "in order to put a far as we can see, according to Boatman" is Mr. De Mille's biggest Park and the Stadium without check on gambling and to maintain peace and good order." This is regarded in some quarters as a piece of unwarranted interference in the affairs of the International Settlement, as an endeavour to show how much better the Settlement odium against it abroad. The sum total of events, says one writer, has been to line up in defence of "the dogs" many who would otherwise be opposed to them.

tainly does appear something in- on congruous in Chinese officialdom posing as full of righteous indignahound racing. If there is one country more than another in which gambling practically dominates the common ground in social interlife of the people, that country is assuredly China. Touching this an introduction of Sir Cecil point, a Shanghai newspaper says | Clementi's "get together" movethat the Hua Lottery alone, which every little servant-maid means more loss to the Chinese year. Then there is the relation between gambling on greyhounds and gambling on ponies. One cor respondent writes to a Shangha paper to point out that the seaso for dog-racing lasts only about fiv months, whilst pony racing goo on more or less continuously for eight months in the year. He the gives some interesting figures based on the assumption that Lun Park and the Stadium are able f complete a full five months' season The turnover, in that event, he say would be about ten million dollars as against a turnover at the tw racecourses which are under Chir ese juridiction of approximatel twenty-two million dollars. these circumstances, it is easy ! see that pony-racing is a muc larger source of gambling than dog racing. Morcover, the Chines authorities would have been o

much firmer ground in making their demand if they had shown that they had made some effort to suppress the gambling associated with the racecourses under Chinese jurisdiction. So far from that being the ense, the Chinese authorities have profited to the extent of some seven lakhs of dollars for the first half of the present year in betting taxes in respect of the International Recreation Club and the Chinese Jockey Club, and have just asked for an advance of \$30,000 on account of the September betting tax.

We realise, of course, that two blacks do not make a white, and that there is force in the argument that there was enough betting in Shanghai before the greyhounds came. There is, however, promoters' standpoint to be considered; it does seem rather hard lines that they should have been given full permission to start operations and then, at this stage are held in abeyance because it has not yet been decided whether parimutuel betting is legal. In giving permission, the Municipal Council must have known the consequences to the intervention of the Chinese authorities, we quite agree that their moral ardour might be more profitably employed in their own territory, but, that point notwithstanding, we cannot see that any good is likely to result from the continuance of greyhound racing |ed his removal to hospital. in the East.

. The Sports Club.

The general public was mor than a little surprised by the announcement in the Telegraph last night that a new club, to be called The Sports Club, organised on an ambitious scale, is in the process of formation. A scheme for connecting Calcutta, Canton and Kowloon by rail was once seriously considered? ..

In 1858, Sir Macdonald Stephenson suggested such a scheme to the Hongiding Chamber of Commerce. The scheme was, however, regarded as premature, and it met with no encouragement on the part of the Chinese Government.

The Very Idea!

According to the Central News-Los Angeles correspondent, William Faltin is to hang-15 years after his original conviction.

Faltin's crime has long since faded from the public memory but, the Judge, while admitting that. the prisoner has "suffered torture and death a thousand times," has. decreed that it is time some "definite action" was taken.

This action has been delayed now for fifteen years. Faltin was. accused and found guilty of murder in 1913.

The death penalty was postresembling those of the complain- poned pending an appeal, which wis dismissed by the Supremo Court. It was then further postponed after the lawyers defending. Faltin had succeeded in getting a re-trial, which proved unsuccess-

> Another trial was secured and this time Faltin was found insaneand sent to an asylum.

Some twelve months later, capital punishment was abolished in Arizona, where Faltin's sentence had been passed, and it seemed howould never meet the hangman. In 1918, however, the death penalty was re-introduced, and this led to Faltin's lawyers mak-

ing further efforts on his behalf. Year after year, the shadow of the gallows remained to torture the condemned man. Again he was brought before the Judge and again his case was considered, but this time the verdict was final. And now, fifteen years after, his original conviction, William Faltin is to hang.

TWO BIG FOOTBALL SURPRISES.

LIVERPOOL WIN EASILY AT SHEFFIELD.

WEST HAM DEFEATED.

Eight matches played in the English Leagues yesterday provided two away victories, both of which were surprises. Liverpool, who went down at home to Shefileld United last week, secured ample revenge at Bramall Lane, winning by three goals to one.

In the Northern Section, the lowly-placed Chesterfield team visited New Brighton and carried away both points.

Burnley go to the top of the First Division by reason of a victory over Newcastle United, in conjunction with West Ham's defeat at Cardiff, the Hammers going down for the first time.

Fulham and Crystal Palace again shared points, while Stockport gained a slashing victory over Ashington.

PRINCE GEORGE SAILS.

DEPARTURE MARKED BY COMEDY OF ERRORS.

Southampton, Aug. 12 A comedy of errors marked the arrival of Prince George here today to embark, in the Canadian Pacific liner Empress of Australia for Canada to join his vessel, H.M.S. Durban, at Vancouver, He was expected to arrive at the docks by pinnace from H.M.S. Rodney, guardship to the Royal Yacht at Cowes.

The Prince, however, in a brown suit and bowler hat, landed at the Royal Pier and drove to the docks, where he was promptly stopped by a policeman. Having stated who he was, Prince George made for the gangway, of the liner only to be again stopped by the outstretched arm of a Master-at-Arms, who informed him that nobody was allowed on board without a permit. The Prince searched his pockets for his ticket, but before this was found the Masterat-Arms was satisfied of his identity, and the traveller was allowed on board. Here he was received by the Commander, Captain Latta, and escorated to his cabin, which he did not leave until the vessel sailed,

American Express Travelers Cheques

Definition of TRAVELLERS' CHEQUES ... The system of Travellers Cheques was originated in 1891 by the American Express Company with the object of creating a form a travel currency which would give the holder the security of a letter of credit and at the same time the convenience of local currency. The Company registered the cheques under the trade name of 'AMERICAN EXPRESS TRAVELERS' CHEQUES' the word "Travellers' being spelled with one "l.". This advantage of the Cheques was so apparent that other banking institutions adopted the system."

Quoted from Pitman's Dictionary of Banking by Wm. Thomson. Issued in G\$10, G\$20, G\$50, G\$100 and \$5 and \$10 denomination-bound in a small handy wallet, and cost only 3/4 of 1 per cent. Secure your steamship tickets, hotel reservation and itineraries; or plan your cruise or tour through:-
